

Superior employee awareness available thanks to the partnership between LUCY Security AG and HvS-Consulting AG

The benefits at a glance:

- First-class IS-FOX training videos now available on the LUCY Server
- Integration of third-party content using the open LUCY software
- Integrated third-party content for free or for a fee

Zug – September 19th, 2018 – Through a partnership with HvS-Consulting, the leading German provider of awareness-raising videos, LUCY Server's customers get the opportunity to use additional first-class training content. Through this supplementary content, it is easy to achieve an even better employee awareness in terms of cyber security.

"HvS-Consulting AG is a partner known far beyond the German borders for their multilingual IS-FOX training videos. This new business relationship will provide our LUCY customers all over the globe with an additional selection of excellent Awareness Training Content available in our standard product. We are very happy to have established this partnership," says LUCY co-founder Oliver Münchow.

"Cyber security is our mission, and the huge demand in the market shows how important sensitization is. In LUCY Security, we have found a partner that positively complements our portfolio with its Phishing Platform and Awareness Software. Further on, this partnership gives us the opportunity to offer our highly successful, multilingual awareness-raising videos across national borders," says Frank v. Stetten, Managing Director of HvS-Consulting AG.

About HvS-Consulting AG - Competence in Cyber Security: The HvS-Consulting AG advises corporations and SMEs around the topic of cyber security since 2002. Their core competencies include ISO 27001 Information Security Management, industrial espionage prevention, Advanced Persistent Threat Detection, penetration testing, as well as employee awareness for information security and data protection. Under the brand IS-FOX [1] they offer web-based training, video clips for employee awareness, and security software, among other things. HvS-Consulting is a member of the Alliance for Cyber Security and is in constant exchange with national security authorities on cyber security topics.

About LUCY Security: The LUCY Cybercrime Prevention Server is utilized for the simulation of social engineering attacks and can be used universally – from SMEs to large customers. The product can be installed directly on the customer's premises, though a cloud version is also available. The Swiss solution provides hundreds of pre-configured phishing templates, training modules, and third-party training content [2], which can be used by the end customer independently. With the "Phishing Incident Plug-in" for Microsoft Outlook the user can raise the alarm in case they suspect an attack. LUCY's "Threat Analyzer" will automatically evaluate and risk-score suspected phishing attack emails, saving valuable time for the security team. The product is currently installed on more than 6000 servers, in over 60 countries. Certified Eco-System partners in 12 countries complement the LUCY software with their value-added services.

The product is offered in the Freemium model: The free Community Edition is suitable for SMEs with up to 50 employees. The commercial Starter Edition costs USD 680 and – unusual for the industry – unlimited licenses are available from USD 3400. The price of the newly integrated Awareness Videos from IS-FOX would depend on the size of the targeted audience.
